

TLP170AM / TLP170GM

Photorelays with Low Trigger Current Contribute to Low Power Consumption in Battery-Powered Equipment

Maximum trigger LED current of 1mA and increased sensitivity of the photodiode array

Features

- Max. trigger current IFT = 1mA
- Compact 4pin SO6 package
- Halogen free

Advantages

- Low power consumption
- Ideal for battery driven equipment

Benefits

- Increasing product lifetime of battery driven equipment
- Easy to design
