

The Delphi Harsh Environment Series (HES) Connection Systems include circular connectors, terminals, and a rectangular 50 and 60 way header. The 24 shell size industry standard connector includes six terminal configurations (47, 31, 29, 23, 21, and 19). Delphi's circular connection systems are available with straight and right angle conduit wire dress covers on both receptacle and plug assemblies.

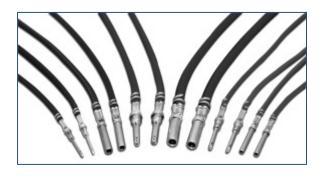

The HES Connection Systems provide higher current capability, improved sealing, higher terminal retention and a significant cost advantage compared to standard pin-and-sleeve systems. Delphi HES Connection Systems are also compatible with existing systems in the commercial and agricultural vehicle markets.

#### **HES Connection Systems**

#### Benefits

#### Terminals

- High current performance is realized through the selection of high conductive materials
- Robust design with a stainless steel sleeve that provides stability and protection to contact interface area
- Overlapping wing design provides exceptional strain relief and larger outside diameter cable range capability
- Crimp stability over the terminal life with the use of tin in the crimp area
- Wide range of cable sizes accommodated with Delphi's crimp design
- Interchangeability with industry standard terminal products

**HES Terminals** 

#### HES Circular Connectors

- Sealing performance exceeds expectations with recessed 3-rib design that will maintain sealing properties even if a tight wire dress is applied, providing better sealing capability up to 30% compared to existing designs
- Superior contact (terminal) retention performance virtually eliminates terminal unseats with a specialized finger design that results in better retention up to 40% when compared to existing designs
- o Interchangeability with industry standard circular products
- Ergonomic design for ease of assembly and to maintain quality:
  - Arrows help simplify pre-engagement of locking collar for simplified mating
  - Visual lock engagement window
  - Color coded seals to distinguish between various cable diameters as well as terminal gender
  - Low torque engage
- Robust construction through sonic welding the seal retainer construction and using wave spring design that
  ensures the connection system maintains face seal compression, even when subjected to the high vibration
  commercial vehicle SAE J-2030 standard

#### Header System

- Virtually eliminates unseats with Delphi's two stage terminal retainer design
- High vibration design passes 29 Grms vibration specification
- Chemical resistant header face seals with the use of flourosilicone
- Built-in probing window protect the female terminal during the build process
- Over-torque bolt design protects the header when too much torque is applied
- True pin position is one of the tightest in the industry at 0.225 mm, ensuring easy mounting to a circuit board
- o Interchangeability with industry standard products

### Typical Applications

Delphi Harsh Environment Series products are suited for the following industries:

- Agriculture
- Commercial vehicle
- Construction
- Marine
- Other harsh environment applications

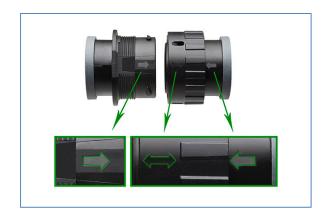

The HES circular design is ideally suited for making connections in a vehicle sheet metal firewall pass-through locations. Because of the rugged connection system design, they are well suited for engine compartments. HES headers are an ideal choice for high density device I/Os that are mounted directly to the engine.

**HES Circular Connectors**

### ▶ Specifications for the 50/60 Way Header Connections

Contacto	Simo 20 (4.0 mm)
Contacts	Size 20 (1.0 mm)
Sealing Plugs	Size 20 (Note: Different part number than HES circulars)
Operating Temperature	- 55 ℃ to + 125 ℃
Physical Shock	Withstands 50 Gs of mechanical shock in three axes without mechanical failure
Vibration	29.4 Grms
Sealing Capability	IPX7
Corrosion Resistance	No corrosion after exposure to 100 hours of salt fog
	Chemical resistant flourosilicon face seal on the header
Electrical	
Contact Current Rating	Size 20: 18 amps maximum current
Contact Plating	Selective gold with tin in crimp area on the female contact
	Gold flash palladium on the header pins
Mechanical	
Contact Retention to	Contact size: Retention force:
Housing	Size 20 90 N
Physical	
Housing	High temperature, glass filled nylon
Seals	Flourosilicone face seals
	Silicone cable seals
Contact Copper alloy	
Plating	Female: Gold with tin in crimp area
	Male: Gold flash palladium
