VORAGO Technologies REACH & POP Compliance Declaration

Under the definition of the REACH regulation EC1907/2006 and POP regulation EU2019/1021, VORAGO Technologies is a producer of "articles". REACH requires article suppliers to inform recipients if an article contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight. As of the date above, none of the articles in VORAGO's integrated circuit products have been found to have equal to or greater than 0.1% weight overweight of any of the 223 SVHCs, except for those identified with RoHS exemptions 7a and 7c-I by Part Number as follows:

Part Numbers: VA10800-CQ12803ECA
VA10800-CQ12803ECB
VA10820-CQ128F0ECA
VA10820-CQ128F0ECB
VA41620-PG196F0PBA
VA41628-PG196F0PBA
VA41629-PG196F0PBA
VA41630-PG196F0PBA

The above listed part numbers contain Pb in the die attach and/or Pb in the solder dip on the leads (balls of BGAs) of the product and are exempted under RoHS exemptions 7a, 7c-I.

Determination of REACH compliance was achieved through supplier based queries and material certifications. This analysis and declaration depends on information supplied to VORAGO from its third party supply chain, manufacturing partners, and internal engineering evaluation. Because our evaluation includes reliance on third party information, we cannot verify to a certainty the accuracy of such third-party information. VORAGO is committed to comply with REACH requirements and notify customers of any change in article content.
