Avnet Supply Chain Solutions

YOUR PERFECT PARTNER

EVERY STEP OF THE WAY, YOUR LOGISTICS ARE IN GOOD HANDS

In today's global business world, getting your products where they need to go can be a complex business. And to maintain your competitive edge, your supply chain needs to be fast and efficient as well as cost-effective. Combining all these demands can take time and distract you from focusing on your core business. That's why Avnet Supply Chain Solutions is here to help. We are a group of seasoned supply chain professionals with years of experience in tackling the thorniest logistical problems. We work with you to analyse your processes and supply chain metrics, agree on goals and tailor a solution to your exact needs.

Along with a range of products unparalleled in its breadth and depth, you also benefit from our state of the art product transformation and warehousing capabilities. And our sophisticated information management solutions provide you with end-to-end connectivity and visibility at every step of the supply chain process between you and us.

Read on to find out how to ensure your supply chain is in good hands.

ASAP

The Avnet Supply Chain Accelerator Program (ASAP) has just the right acronym. It's all about speed – but combined with quality. Fast decision-making, reactivity to customer requirements, delivery and service make a tangible difference to your bottom line.

ASAP encompasses a range of tools, best practices and processes that we can select and combine to design the best solution for your needs. Whether you are trying to reduce total cost of ownership, minimise risk or boost your

flexibility and agility, we can help you achieve your goals today and tomorrow – even if tomorrow's goals are different. That's because our decades of supply chain experience have taught us that change can happen fast – and usually does. If you need a streamlined, highly efficient supply chain to make your business stand out, talk to us about ASAP. We are always ready to listen and advise.

/ASAP

Supply Chain Solutions

Our portfolio of solutions comprises innovative tools as well as tried and tested methodologies to resolve all manner of supply chain challenges. Are inefficient or interrupted processes holding you back from reaching financial or customer satisfaction targets? Do you need to reduce the cost of your supply chain but are unsure how to tackle it? Our specialists are here to help. We have worked on hundreds of various projects throughout Europe – so we are sure to have the expertise and tools to help you achieve your goals.

Forecast

Avnet's Forecast Management solution responds to the needs of our customers: assurance of supply and a corresponding level of agility. We help by providing easy-to-use protocols to share forecast data, assist to validate the information flagging any exceptions, and identify market/sector changes in demand.

At Avnet, we share the common goal of providing the most accurate input to ensure that when material is needed – it is available – reducing any supply base risk.

Consignment

Avnet's consignment solutions help our customers meet their goals of swift and reliable replenishment with a delay in ownership until actual point of consumption.

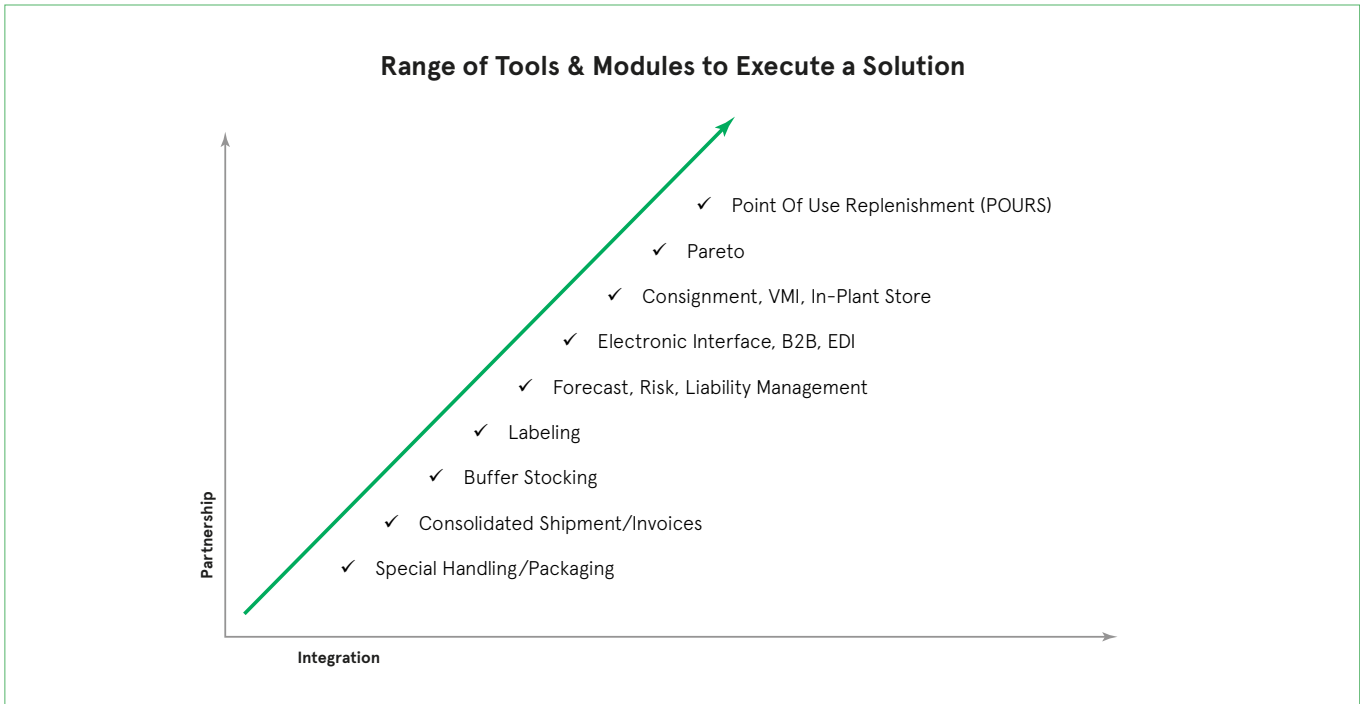

A carefully designed consignment solution can provide transparency of inventory availability and security while improving your working capital management.

VMI

Vendor Managed Inventory (VMI) allows Avnet as a key supplier to simplify and accelerate component replenishment processes for customers. The service is based on your own forecast or production planning figures – which we support in a variety of formats – as well as current stock and consumption level. Avnet uses these figures to identify the right replenishment quantities to ensure the inventory needed for production is delivered as required.

Kanban

A pull-based system is often the optimal solution when demand is constant but relatively uncertain. Avnet's Kanban solutions were developed to provide an alternative to traditional push-based replenishment techniques. With this proven and reliable solution, we add considerable value by reducing on-hand inventory, simplifying order management and fulfillment with shorter cycle times for material replenishment.

Value Added Services

Avnet's physical value-added services are designed to provide ready-to-use components to meet the varying needs of your production. Services including bar coding, tape and reeling, programming, packaging etc. are available to Avnet's customers and are easily customised to meet your specifications.

B2B Solutions

The speed of your information flow can make all the difference to winning a new business opportunity or avoiding a risk. This is where our B2B solutions come in. With fast, efficient data transmission between you and Avnet, you can react much faster to market changes – enhancing your competitive edge and boosting customer satisfaction. In addition, you have the peace of mind of knowing you are working with high-quality and accurate data.

Traditional EDI

Avnet's traditional EDI capability covers the full range of transactions from forecast to orders and from shipment notification to invoicing. All transactions are based on the common EDIFICE standards and therefore provide a swift and efficient implementation. The reduction in both processing time and errors makes EDI a smart choice for improved efficiency and quality between you and Avnet.

AMICON

Avnet's AMICON solution meets the needs of the enterprise with B2B transfers of key supply chain data for quick availability and more efficient upload when EDI is not a viable option for a customer. The AMICON goal is to provide enterprise partners with possibility to make better use of today's electronic tools to reduce administration efforts and potential errors common in more manual approaches for data entry and works in conjunction with Avnet's Supply Chain Solutions offering.

POURS

Avnet's innovative Point-of-Use Replenishment System (POURS) is a web-based turnkey solution for customers who want to use bar code scanning as a trigger for efficient replenishment. This highly automated and proven solution works perfectly in JIT/Kanban, Consignment, and VMI scenarios where speed and simplicity are crucial for a streamlined fulfillment process of material replenishment.

Avnet has released a free POURS app allowing customers to approve orders, track shipments or accommodate exclusions.

PARETO

The administration of C-items of inventory can be more costly than the actual value of the components themselves! This is why we developed our Pareto solution. You benefit from a seamless supply of lower-cost components at just the right moment. As it's easy to install and use, Pareto is a popular choice for demand-driven supply chains.

AVNET SUPPLY CHAIN SOLUTIONS – LOCAL, MULTI-COUNTRY, GLOBAL PERFECT PARTNER

As our customers' supply chain strategies have progressed from site-based to multi-country/multi-region and now to a global scope, Avnet has in turn developed its capabilities to respond to customers' requirements for supply chain solutions around the globe.

Today, Avnet has regional teams of supply chain specialists who can support you in the execution of your supply chain strategy in Europe, Middle East and Africa, the Americas and Asia. Each team is able to offer a similar set of supply chain solutions that can be tailored to your risk management, cost and working capital needs.

As you implement the required supply chain solution that is aligned with your overall business strategy, Avnet can work with you to extend this type of solution to your other sites. You can benefit from Avnet's Safe Passage process in migrating your supply chains and from tools such as B2B Connectivity, Consignment/VMI, Reduced Lead Time and POURS to apply the right solution to your manufacturing region.

For our customers who outsource their production, Avnet is a leading supplier to the contract manufacturing industry around the globe. This leadership benefits you, because we may well be working with your CM partner already. If so, they are likely to be using a supply chain solution that will support you too.

The supply chains of the future will only grow more complex as our customers pursue new markets and cost advantages. That makes it more important than ever for them to optimise their geographic manufacturing footprint. Avnet will continue to invest in its ability to support its customers around the globe.

We are ready to be your Perfect Partner!
